¹ This monthly review complies with all of the elements required by California Government Code §53646(b), with the exception of a detailed listing of each investment. A complete copy of the *Quarterly Pooled Investment Fund Report*, including a detailed listing of each investment, is available on the Department of Finance, Investment Division Web page at <http://www.finance.sacounty.net/Investments/RptQuarterly.asp>.

² Market prices remain above par due in part to the market expectations the Federal Reserve will keep inflation contained with future rate hikes. During the last FOMC meeting on February 2, 2005, the Federal Reserve increased the Fed Funds Rate to 2.50% from 2.25%. The FOMC reiterated their belief any future increases in interest rates will be at a "measured" pace.

YIELD HISTORY

The earned interest yield history represents gross yields; **costs have not been deducted**. The estimated investment management costs in the prior year were approximately 15 basis points or 0.15%. The quarterly apportionment of earnings to participating funds will be made on a **cash basis** (as opposed to an accrual basis) for the first three quarters of the fiscal year. Earnings to participating funds will be annualized over the fiscal year based on a fund's cumulative average daily cash balance at each quarter end and fiscal year end. At fiscal year end (fourth quarter), the earnings of the pool will be converted to an accrual basis for the fourth quarter earnings' allocation.

CASH FLOW PROJECTION

The Pooled Investment Fund cash requirements are based on a 14-month historical cash flow model. The model has been adjusted for expected non-reoccurring participant liquidity needs. This projection, updated on March 7, 2005, is sufficient to meet cash flow expenditures for the next six months.

³The earned income yield is the total net earnings divided by the average daily portfolio balance multiplied by 365-day basis and then divided by the actual number of days in the month. The reported yield fluctuates based upon the number of days in the month, thus resulting in the anomaly of higher yields being reported for months with fewer days. February's yield is a prime example of such an anomaly.

⁴Any excess net cash flow amounts in this column will be used to fund the negative cash flow positions in later months.
